

We live on a tiny speck in the Cosmos. It has no life rafts. We must take good care of it and act responsibly as there is no other place to go. The air, water and ground were pure in 1800. Now the air is polluted and thousands are dying from it. Our Great lakes fish are unsafe to eat. The ground water is polluted. We must make businesses be responsible with enforcement. Stop pollution. Clean it all up. Mankind also needs to clean up it's act or suffer self extinction. If one looks at human history the main occupation next to survival was killing fellow humans. When it was just tribes battling each other, all of mankind was not at risk but now with nuclear weapons even a relatively small nuclear exchange can trigger nuclear winter causing mankind's extinction. This is not a joke rather a real serious possibility and we are on a hair trigger to cause it to happen. Yes seriously. Those of us who were involved in it know about it and **that is the truth**. Another threat is caused when there are bacteria which can quickly evolve and become resistant to our drugs (which is what is happening) and large numbers of humans. Scientists in the know about bacteriology are warning of a severe threat of a pandemic which we will not be able to stop. We must push for more research now on ways to prevent this. Even the rich with their large fancy secret underground bunkers can not escape the minute viruses and bacteria.

We need to learn from history so as to prevent future mistakes. Those who do not look at history and learn from it are doomed to repeat the mistakes of the past. Learn from others' mistakes.

History teaches one to be vigilant, prepared, well informed, educated and communicative. People, countries and cities that are not are conquered which may lead to death or slavery. It has happened many times in the past and is happening now. Get informed. Better to think and lead than to be led. A threat to one of us is a threat to all. Plato said "The price of apathy (lack of concern) towards public affairs is to be ruled by evil men." Too many people today limit their interests to the entertainment culture and ignore the real world around them. They can tell you who is hot on Idol but are totally unaware that they are about to be stiffed again by those in power. The big money interests rule and the people have become sheeple. Read page 9 about mu chips and what government and corporate databases are collecting about you. Many feel that scientific dictatorship is now possible because the people with the real money and power can control the rest of us. This is serious. I am a college professor and have taught about technology for years. I know. You need to get informed about this.

On the other side of this page is a statement of what (The American Way of Life) us veterans fought for and one and a half million of our brothers and sisters died for. You can see that it comes from the Declaration of Independence, Constitution and the American experience with freedom. It gives guidance on what we should promote and gives the ideal standard of conduct that is much needed today. Confucius, Socrates, Jesus and great thinkers agree the best way for humans to get along is: Don't do to others what one does not want done to oneself. Do only as you want to be done to.

This code of conduct must be taught and made the expectation for all human actions. Parents must teach this to children and teach them to be responsible for their actions. Humans should be Humane. Those who commit crimes should be held accountable to repay the damages they caused. Swift and sure punishment is the best crime deterrent. It costs \$40,000 a year to have criminals sit and receive free medical care, free legal with room and board. There are lots of public service jobs they can do to put their idleness to work for us taxpayers. (cleanup, mowing, road repair, installing solar shingles on all buildings, public construction such as building needed subways for better weather free transportation for all.) Think of the benefits free electricity, less traffic, cheap mass transit lower taxes.

We need a fair tax system in which the rich and corporations pay their fair share which they are not doing now. Many corporate officers and CEOs make millions while thousands of their employees are on starvation wages or limited hours and need public assistance. No corporate officer should make more than 10 times the lowest paid employee. Pay them a living wage, give adequate hours.

History teaches that if you have enemies or enemy sympathizers living amongst you that sooner or later they will hurt you. Those who believe in an ideology that it supports killing of non believers and who reject equal rights for women and who reject human rights and who do not fully support our US Constitution should be deported. There is lots of room for them in countries which support their ideology which is Anti American and anti Western. Why? Just look at France. Look at their actions in countries in which they have a majority. (which speak louder than their lies) Even they don't want to live in their own countries. If they come here become an American and support our way of life, or leave. One last item: Billions of our tax dollars are wasted yearly. Stop this waste.
