

Lets
create safe
fast cheap
subways
to go all
over. End
traffic &
parking
hassels.
Create
beautiful
parks all
over our
city. Grow better,

more nutritious food here in our own city. Home grown food is also safer. Underground shopping malls by the subways like in Toronto are safer, weather free. No rain or snow and are even tornado proof. We can plan and create a better city and a better world for all using geodesic domes and new scientific gardening.
