

Computers have increased in power and decreased in size so that soon they will fit into a pair of glasses or be worn on our wrists or on clothing and may be implanted in our bodies to provide us with additional capabilities and information. **Bots** can and will replace “experts” in many fields and many white collar executive positions. Expert projections tell us to expect to see 60% of current jobs automated by bots and robots in the next decade and upwards of 90% within 60 years. Very few new jobs will be created so this is going to free up humans from having to go to work. We will need to change our economic system to a resource based system. One idea is to

use taxpayer money to set up solar panels nationwide (using prisoner labor at no additional cost) then divide the output of kilowatts by the number of US Citizens and every person would have solar energy credits to use like money. Make each citizens share enough to live on. There is ample solar energy that hits the USA every day to provide much more than we need even including giving us free fuel for everyone's electric cars. Tell congress to start making this happen now.

Solar panels can be had for around \$100 for a 100 watt panel. One of those a battery, a \$30 regulator and inverter will give your house lights, run a TV and laptop computer and charge up all of your fones. I already get a lot of my power for free and the best part is that I never have to worry about a power outage again. We love our independence. We must make sure the government doesn't get their greedy hands in this. I am researching getting an electric car, scooter or three wheeler that I can charge up with my own free fuel. Autonomous cars will drive us or pick up the kids much more safely than human drivers and will talk with each other. Human drivers kill thousands of innocent humans every year.

The Internet of Things is coming like it or not. Things will have computer chips and will “talk” to other things. The refrigerator will tell your smart fone what needs to be ordered from the grocery store and the fone will automatically order those items to be picked up by your autonomous car. Your house will automatically adjust the temperature, lights, music etc. or you can just speak to your house and request it to make any change you want. Your implanted RFID chip will allow you to make purchases without money and will unlock your car or house upon your approach. Paper and metal is being replaced by electronic money (which can be controlled by Big Brothers.) Very little is now purchased with paper money which is no longer backed by gold or silver and may become nearly worthless as the federal government is so over its head in debt that it can barely keep up its payments to China who bought much of its debt. China now uses our debt payments to finance its military which may surpass the US military. China educates its bright children while the USA has cut education so much that the US kids are actually behind most other countries. In fact the US no longer produces enough engineers to meets it needs and has to import foreigners to fill positions. What a disgrace. China is about to surpass the US in technology and economics. US Congress no longer represents the American People.

Personal Bots and robots will do tasks for you, such as finding information, making calls, mowing and cleaning, watch the kids, teach and entertain them. Robots can also be companions and pets that to show love and kindness, and do work for us and perhaps even defend us. Japan already has robots for sale that take this companionship quite a bit further (never gets a headache) get my meaning. What? with a machine not me. Hey Roboto! Clean the house, take out the garbage, wash the dishes and car and mow the lawn. The wife and I are going to take a nap. With bots and robots taking over most work will free up humans for a wonderful creative life with endless wonderful possibilities of things to do and enjoy. The trans-human era is beginning. We already have hip, and eye lens implants and soon there will be other artificial body parts. Computer chips and medical devices inside the head are already being used to tame epilepsy and Parkinsons. Soon they will cure blindness and deafness and supplement our sight, memory, hearing and do other things for us. Human life expectancy will increase. Robotic exoskeltons allow soldiers to lift heavy weights. Robots will become soldiers. Drones will deliver packages and spy on us. RFID powder will allow tracking of everything and everybody all fed into Big Brother's databases including all of your Internet use, fone, financial, locations and more now being recorded just like your driver's license picture is now. along with coming ubiquitous public camera surveillance. They are listening and watching getting ready to control us. Our children may be immortal robots with super artificial intelligence surpassing all of the foolish human race. Unless humans now act wisely and with compassion they will cause their own extinction causing a post-human era with wise artificial intelligence taking over the planet.
