

The show is yet to begin
on a Wonderful Future.
For All Citizens

There is much more history, at macombhistory.us and on my free DVD. This book is just a summary of parts of a 33 volume work by Professor Wesley Arnold humble historian. This work has value because it presents much more area history and other important things left out by authors of other books. He actually gave much material to other authors and continues to do so. History should be a learning tool to help all avoid mistakes and to improve the well being of everyone in the community. We need to improve the education of all, especially our youth many of whom place below students in 3rd world countries. This active college professor sees daily that our kids are not graduating from high school with adequate knowledge. They are lacking in many areas of knowledge. Many are without common sense. Many are in fantasy land, entertainment land or in “you owe me a good living land because I am entitled.” History should be used with a questioning attitude of how can we improve. Over crowded unplanned dead urban concrete could be improved with a planned mixture of housing, and park/farms where some of our food could be safely produced locally while cleaning the air and reducing noise and providing children with a better environment. Cities have grown without intelligent planning for the welfare of all citizens especially children. Efficient, weather free, inexpensive, quick, mass transit can be put underground together with climate controlled tornado safe shopping malls as in Toronto. These could include easy to get to businesses. Even year round temperature means reduced costs in heating and cooling. Replace concrete above ground with beautiful areas of trees, flower filled meadows and ponds, with supreme natural beauty. With a good mass transit underground tube system anyone in the area could go anywhere quickly, cheaply and without driving, or parking hassles. There would be no snow or ice hassles. and less traffic, less jams, less accidents. This can be created while creating jobs. Change welfare into workfare and offer training and jobs to everyone not working. Also use free prisoner labor. Or would you prefer to continue to spend \$35,000 a year to coddle criminals with better health care than we have, cable TV, weight rooms, free legal services and conjugal visits all at your expense and have them put out without rehabilitation to commit more crimes against you. We are all sentenced to a life of work why should they get a free ride on us. While they are at it they should install solar shingles and panels and insulation on every home and building in the city to make us energy independent and add Geo-thermal heating causing great savings to all in energy costs. Buildings could also trap rain water (purer than our tap water) like they did in the old days saving us more money. Law creation, enforcement, court and prison systems need to be made fair & efficient. Special interest groups, private, banker and corporate greed needs to be regulated for the benefit of all. We are tired of being ripped off. All utilities including phone and cable should be non profit. Stop waste in government spending and salaries. No government, corporate, or banking officer should be allowed to make more than 10 times that of the lowest paid worker. Require congress to have to abide by all laws it passes with no special treatment. We need to start planning for a better future and making it happen. Better parenting is needed. Educate all on our Bill of Rights which gives us many Freedoms including: Freedom of Speech, Freedom of the Press, Freedom of Religion, Peaceful Assembly, Fair Trial, Freedom to openly bear arms, Privacy.
